July 15th 2019

Aircon Mechanical Systems Inc.

#21, 1260 Journeys End Circle, Newmarket, ON

Dear Eric Laval, P.Eng.

Just wanted to let you know how much the staff, tenants as well as myself at Women's College Health Research appreciate the work you and your team at Aircon Mechanical Systems Inc. put into the chiller replacement project at 790 Bay Street. Your installation was completed properly, on schedule and under budget.

It was a pleasure working with you through the project as professionalism, knowledge and positivity was shown throughout.

We have already had the opportunity to enjoy the benefits of the new chillers you installed in terms of hydro costs, noise levels, and operational reliability.

We hope to maintain a long and healthy working relationship with Aircon Mechanical Systems moving forward.

Sincerely,

Signature

Harry Hodder, Facilities Manager
